MACAO

Cotai Expo The Venetian

Organiser:  **PUISSANT GROUP**

Co-Organiser:  **CEMS Global**
USA

Against the accelerated global urbanization drive, urban populations are projected to account for 70% of the world's total population by 2050, with urban areas generating over 80% of global GDP. During this transformative era, governments and industries worldwide are collectively exploring digital technologies, artificial intelligence and eco-friendly low-carbon solutions to address key challenges including urban governance bottlenecks, transportation and logistics inefficiencies, energy shortages and overloaded infrastructure.

As one of the most influential platforms for exchange and demonstration in Asia-Pacific urban innovation and digital economy, Smart City Asia Expo 2026 integrates abundant industry resources. It commits to converting cutting-edge intelligent computing algorithms, IoT infrastructure and core technologies into tangible solutions that directly improve residents' quality of life, and facilitates in-depth integration of the regional digital economy ecosystem.

Hosted at The Venetian Macao Cotai Expo from 18th to 20th November 2026, the expo will occupy a planned gross exhibition area of 60,000 square metres. It is expected to gather more than 1,000 premium exhibitors and benchmark brands from over 30 countries and regions globally, welcoming over 20,000 professional visitors, overseas government delegates, urban investment groups and international purchasing delegations to Macao.

Concurrent Co-located Fairs

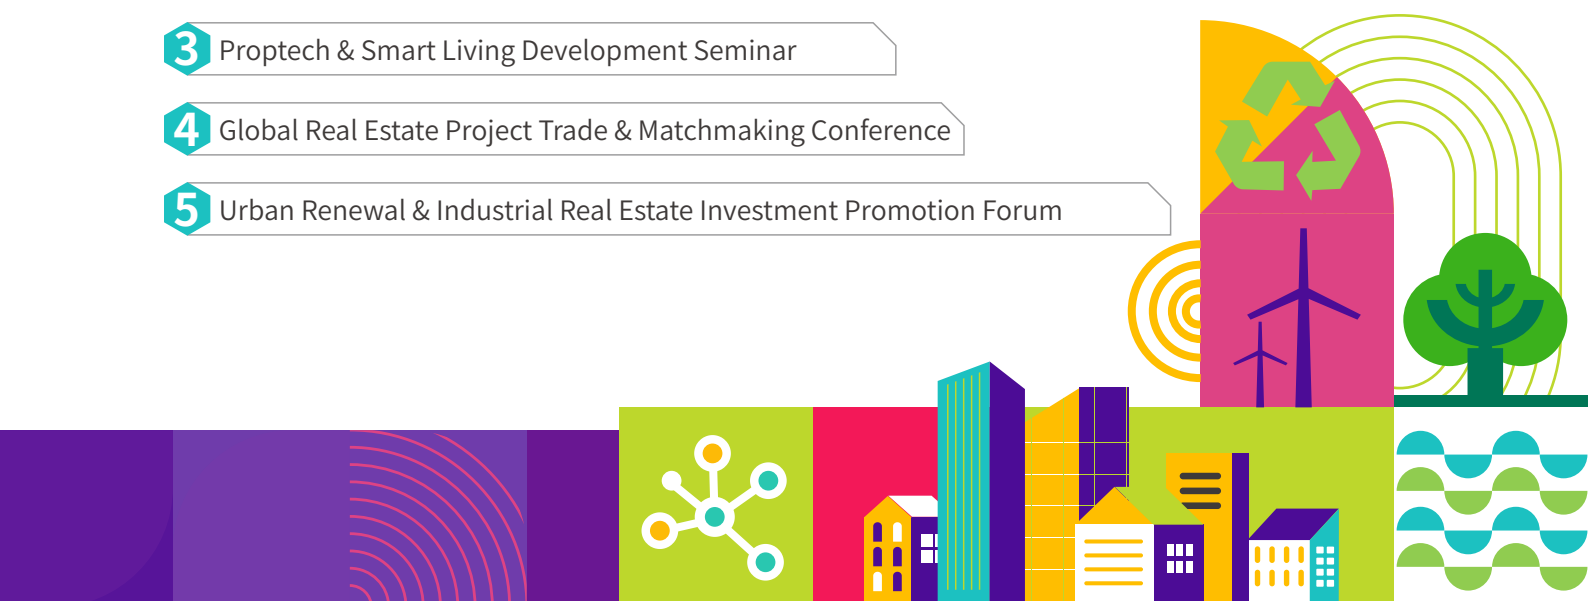

This expo will be held alongside a series of specialized exhibitions covering digital economy, technological innovation, green building materials and trade services, including HVAC ASIA (Asia International HVAC, Refrigeration, Kitchen & Bathroom Expo), Build Asia (Asia International Building Materials Expo), APS-Asia International Property Show, HORECA Asia International Hospitality & Catering Expo and AHSE Asia International Hotel Supplies & Food Expo. By fully consolidating cross-show resources, all events will share tens of thousands of professional visitors, industry networks and media channels, connect the entire upstream and downstream industrial chain, realize visitor resource sharing and multiply business opportunities through joint exhibition operation.

Concurrent On-site Events

To enrich academic exchange and business matchmaking value, the expo will host high-profile themed activities focusing on cross-border investment, smart living, urban renewal and proptech:

- 1 Greater Bay Area Cross-border Real Estate Investment Summit
- 2 Cultural Tourism & Health Care Real Estate Project Promotion Conference
- 3 Proptech & Smart Living Development Seminar
- 4 Global Real Estate Project Trade & Matchmaking Conference
- 5 Urban Renewal & Industrial Real Estate Investment Promotion Forum

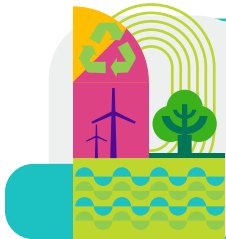

Exhibition Product Categories

Enabling Technologies

Urban large language models, Agentic AI, urban digital operation command centre (Urban Brain), digital twin city platforms (BIM/CIM), 5G/6G communications, big data analytics, IoT sensing infrastructure, blockchain, cloud computing, edge computing, smart government affairs, network and data security solutions.

Green Energy

Digital and intelligent management systems for climate change response and carbon neutrality, renewable energy sources, smart microgrids, distributed energy storage systems, solid waste recycling and intelligent waste sorting, air quality monitoring, smart water management sensor networks, integrated solutions for low-carbon buildings and zero-carbon smart industrial parks.

Smart Mobility

Autonomous driving technologies, connected vehicles (V2X), electric and hydrogen-powered vehicles, Urban Air Mobility (UAM), low-altitude drone logistics systems, integrated Mobility as a Service (MaaS) platforms, intelligent traffic signal coordination & control systems, smart parking and contactless payment technologies.

Public Services

Smart healthcare systems, 5G emergency medical services & cloud prescription services, smart education and digital campus solutions, digital social security services, emergency management and intelligent fire prevention sensor networks, grassroots social governance smart platforms, 3D digital transformation of underground utility pipelines, smart community management systems.

Infrastructure & Building

Smart buildings, integration of spatiotemporal big data and City Information Modelling (CIM), intelligent construction technologies, eco-friendly building materials and zero-carbon architecture, prefabricated construction techniques, digital management systems for indemnificatory housing, energy-saving renovation for existing buildings and urban space renewal solutions.

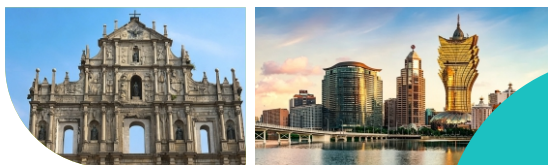

Core Advantages of the Exhibition

01

Prime Location of Macao & Free Trade Port Policy Benefits

As an international metropolis and free port, Macao boasts unique institutional strengths to connect global business partners. Citizens from up to 81 countries and regions enjoy visa-free entry to Macao, making it a top overseas gateway for Chinese smart city enterprises to tap into the trillion-level smart city markets of RCEP, the EU and the rest of the world.

02

Large-scale Exhibition & Wide Geographic Coverage

With a planned exhibition area of 60,000 sqm and over 1,000 global exhibitors from more than 30 countries and regions, this will be the most large-scale and comprehensive one-stop trade and procurement event for smart city solutions across the Asia-Pacific region.

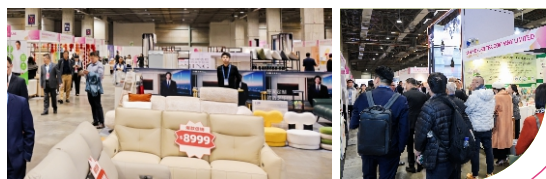

SMART CITY
ASIA EXPO MACAO

03

Full Industrial Chain Linkage & Expansion of Private-sector Orders

Breaking the traditional reliance on municipal public procurement, the expo deeply engages diverse private sectors including commercial real estate, cultural tourism, modern logistics and major public utility groups. It helps exhibitors secure cross-industry partnerships and develop diversified, long-term business orders.

04

Targeted Buyer Invitation & Precise Demand-supply Matching

We selectively invite urban investment groups, municipal planning authorities, engineering construction firms, tech buyers from the Greater Bay Area, overseas government delegations and professional investment institutions from the Asia-Pacific region and worldwide. Round-the-clock targeted business matching services are provided to translate technological solutions into tangible deals.
